SUMMARY

Engineering manager with 10 years in the industry, including 4 years leading platform and infrastructure teams. Focused on building healthy engineering cultures, growing engineers into senior roles, and delivering complex platform migrations with minimal disruption.

CORE SKILLS

Leadership	Team building, performance management, hiring, roadmap planning
Technical	Distributed systems, Java, Python, AWS, Kubernetes
Process	Agile/Scrum, OKRs, incident management

EXPERIENCE

Engineering Manager, Platform Infrastructure

Stonegate Financial Technologies — Boston, MA

Mar 2021 - Present

- Lead a team of 11 engineers across 2 sub-teams responsible for internal developer platform and core infrastructure.
- Directed a 14-month migration from a monolithic deployment system to a self-service internal platform, reducing average deployment lead time from 3 days to 25 minutes.
- Grew 3 engineers into senior roles and 1 into a tech lead position through structured mentorship and career planning.
- Reduced team on-call burden by 50% by driving a reliability-focused roadmap and investing in automation.
- Partnered with senior leadership to set quarterly OKRs, consistently delivering 85%+ of committed roadmap items.

Senior Software Engineer / Tech Lead

Beacon Hill Software — Boston, MA

Jan 2018 - Feb 2021

- Served as tech lead for a 6-person team building the company's core order-management system.
- Led the architecture for a re-platforming effort onto AWS that cut hosting costs by 35%.
- Stepped into people-management responsibilities in the final year, running weekly 1:1s for 4 engineers ahead of a formal move into management.

Software Engineer

Redline Systems — Boston, MA

Jun 2014 - Dec 2017

- Built backend services in Java for a logistics tracking platform used by regional shipping partners.

EDUCATION

Boston University

B.S. in Computer Science

2010 - 2014
