SUMMARY

Gameplay engineer with 6 years of experience shipping titles in Unity and Unreal Engine across mobile and PC. Enjoys owning systems end-to-end, from core gameplay mechanics through performance optimization for lower-end hardware.

CORE SKILLS

Engines	Unity, Unreal Engine 5
Languages	C#, C++, HLSL (shader basics)
Systems	Gameplay programming, physics, AI/pathfinding, multiplayer networking
Tools	Git, Perforce, Jenkins, Jira

EXPERIENCE

Senior Gameplay Engineer

Pixelforge Interactive — Los Angeles, CA

Feb 2022 - Present

- Lead gameplay programmer for a mobile action-RPG that surpassed 3 million downloads and reached the top 10 in its category at launch.
- Designed and implemented the game's combat and ability system, supporting 40+ unique character abilities with a shared, extensible framework.
- Optimized rendering and gameplay logic for low-end Android devices, improving average frame rate from 34fps to 58fps on target hardware.
- Built the in-house level-editor tooling used by the design team, cutting level-creation time from days to hours.

Gameplay Engineer

Skyline Games — Los Angeles, CA

Jun 2019 - Jan 2022

- Implemented core gameplay systems in Unreal Engine for a PC co-op survival title, including inventory, crafting, and a day-night cycle system.
- Built a client-server networking layer supporting 4-player co-op with rollback for latency compensation.
- Collaborated closely with designers to iterate on combat feel, running weekly playtests that directly shaped the shipped combat system.

EDUCATION

DigiPen Institute of Technology

B.S. in Computer Science, Real-Time Interactive Simulation

2015 - 2019
