

Lucas Andersson

Site Reliability Engineer

lucas.andersson@fjordwiremail.com | (720) 555-0164 | Denver, CO | [linkedin.com/in/lucasandersson-sre](#) | [github.com/l-andersson](#)

SUMMARY

Site reliability engineer with 6 years of experience running large-scale cloud infrastructure. Focused on eliminating toil through automation, improving system observability, and keeping services reliable during high-traffic events.

CORE SKILLS

Cloud & Infra	AWS, GCP, Terraform, Kubernetes, Helm
Languages	Python, Go, Bash
Observability	Prometheus, Grafana, Datadog, OpenTelemetry
Practices	Incident response, chaos engineering, capacity planning, SLOs

EXPERIENCE

Site Reliability Engineer

Summit Streaming — Denver, CO

Feb 2021 - Present

- Own reliability for a video-streaming platform serving 3M+ concurrent viewers during peak live events.
- Designed and rolled out SLO-based alerting across 60 services, cutting false-positive pages by 70%.
- Led incident response for a major regional outage, restoring service in 18 minutes and authoring the postmortem that drove 12 follow-up reliability projects.
- Built a Terraform module library adopted company-wide, reducing new-service provisioning time from 2 days to under 2 hours.

DevOps Engineer

Ironclad Systems — Denver, CO

May 2018 - Jan 2021

- Migrated a fleet of on-prem services to Kubernetes on AWS, reducing infrastructure spend by 28%.
- Built CI/CD pipelines in Jenkins and GitHub Actions that cut average deployment time from 40 minutes to 6.
- Ran the on-call rotation for a 24/7 logistics platform, maintaining 99.95% uptime across two years.

EDUCATION

Colorado School of Mines

B.S. in Computer Engineering

2014 - 2018

CERTIFICATIONS

- Google Professional Cloud DevOps Engineer
- HashiCorp Certified: Terraform Associate
