

Marcus Chen

Cybersecurity Engineer

marcus.chen@ironwatchmail.com | (571) 555-0129 | Arlington, VA | linkedin.com/in/marcuschen-sec | github.com/mchen-sec

SUMMARY

Cybersecurity engineer with 5 years of experience across threat detection, incident response, and cloud security hardening. Holds CISSP and OSCP certifications and has led response for high-severity incidents affecting enterprise infrastructure.

CORE SKILLS

Security	Threat detection, incident response, penetration testing, vulnerability management
Tools	Splunk, CrowdStrike, Wireshark, Burp Suite, Metasploit
Cloud	AWS security (IAM, GuardDuty, Security Hub), Azure Sentinel
Scripting	Python, Bash, PowerShell

EXPERIENCE

Cybersecurity Engineer

Ironwatch Security — Arlington, VA

Jun 2022 - Present

- Lead incident responder for a managed detection team covering 40+ enterprise clients; triage and contain an average of 15 active incidents per month.
- Built detection rules in Splunk that reduced mean-time-to-detect for lateral movement attacks from 6 hours to 40 minutes.
- Ran a red-team engagement against internal infrastructure that uncovered a critical privilege-escalation path, leading to a company-wide IAM policy overhaul.
- Authored the incident-response playbook now used as the standard onboarding reference for new analysts.

Security Analyst

Fedline Technologies — Arlington, VA

Aug 2020 - May 2022

- Monitored SIEM alerts across a 24/7 SOC, triaging over 200 alerts weekly and escalating confirmed incidents.
- Conducted quarterly vulnerability scans across 1,200+ endpoints, driving remediation of 95% of critical findings within SLA.
- Automated phishing-report triage with a Python tool that cut analyst review time by 60%.

EDUCATION

George Mason University

B.S. in Cybersecurity Engineering

2016 - 2020

CERTIFICATIONS

- CISSP
- OSCP
- AWS Certified Security - Specialty
