

Mei Lin Wong

Android Software Engineer

meilin.wong@harbourbyteemail.com | (628) 555-0121 | San Francisco, CA | [linkedin.com/in/meilinwong-android](#) | [github.com/mlwong-android](#)

SUMMARY

Android engineer with 5 years of experience building consumer apps in Kotlin, including a fintech app with over 2 million installs. Focused on clean architecture, modularization, and squeezing out reliability on lower-end devices.

CORE SKILLS

Languages	Kotlin, Java
Android	Jetpack Compose, Coroutines/Flow, Room, WorkManager, Hilt
Architecture	MVVM, Clean Architecture, multi-module apps
Tools	Gradle, Firebase, GitHub Actions, JUnit/Espresso

EXPERIENCE

Senior Android Engineer

Harbourbyte Financial — San Francisco, CA

Sep 2022 - Present

- Own the Android client for a personal-investing app with 2.1M+ installs and a 4.6-star Play Store rating.
- Led the migration from XML layouts to Jetpack Compose across the app's main navigation flows, reducing UI-related bug reports by 45%.
- Modularized the app from a single module into 14 feature modules, cutting incremental build time from 4 minutes to 50 seconds.
- Rebuilt the background sync system with WorkManager and Coroutines, reducing failed sync incidents on low-end devices by 70%.

Android Engineer

Tallgrass Mobile — San Francisco, CA

Jul 2020 - Aug 2022

- Built core features for a fitness-tracking app used by 800,000+ monthly active users, including Bluetooth device pairing for wearables.
- Reduced app crash rate from 1.8% to 0.3% of sessions through systematic crash-log triage and targeted fixes.
- Introduced automated UI testing with Espresso, catching regressions in checkout and onboarding flows before release.

EDUCATION

University of California, San Diego

B.S. in Computer Science

2016 - 2020

CERTIFICATIONS

- Associate Android Developer Certification
