

Rohan Mehta

Data Scientist

rohan.mehta@brightfieldmail.com | (206) 555-0172 | Seattle, WA | [linkedin.com/in/rohanmehta-ds](#) | [github.com/rmehta-data](#)

SUMMARY

Data scientist with 5 years of experience applying statistical modeling and NLP to healthcare and patient-engagement products. Comfortable owning a problem from raw data through to a production model, and skilled at translating findings for non-technical stakeholders.

CORE SKILLS

Languages & Tools	Python, R, SQL, PySpark
ML/NLP	scikit-learn, PyTorch, spaCy, Hugging Face Transformers
Data Platforms	Snowflake, Databricks, Airflow
Visualization	Tableau, Plotly, matplotlib

EXPERIENCE

Data Scientist

Cascadia Health Analytics — Seattle, WA

Sep 2021 - Present

- Built a readmission-risk model for a network of 14 hospitals that improved early-intervention targeting, reducing 30-day readmissions by 9% in a controlled pilot.
- Developed an NLP pipeline to classify unstructured clinician notes into standardized risk categories, processing 2.3M records with 94% precision.
- Partnered with product and clinical teams to launch a patient-engagement scoring model now used across 3 product lines.
- Established the team's first model-monitoring framework, catching two instances of data drift before they affected production decisions.

Data Analyst II

Meridian Insights Group — Seattle, WA

Jul 2019 - Aug 2021

- Built forecasting models for client demand planning, improving forecast accuracy by 17% over the prior baseline.
- Automated a suite of recurring client reports in Python, saving the analytics team roughly 15 hours per week.
- Presented quarterly insights directly to client executives, translating statistical results into concrete operational recommendations.

EDUCATION

University of Washington

M.S. in Statistics

2017 - 2019

Purdue University

B.S. in Applied Mathematics

2013 - 2017

CERTIFICATIONS

- Databricks Certified Data Scientist Associate
